

I'm Out

EASY TRACKING OF "COMINGS AND GOINGS" !

I'm Out! is a PC-based representation of a traditional out board — with a HUGE difference! It can be seen and updated from any personal computer on the network! With a quick glance, see who is in and — who is out. The board automatically updates the note field with the return time, or it can also be edited to show a person's location or number where they may be contacted. *I'm Out!* can be minimized on the desktop to provide a discreet reminder, or quick access.

QUICK ENTRY

- ◆ Just click on the appropriate return time.
- ◆ Enter comments, or let the program automatically update the return time

FEATURES

- ◆ "Fool Proof" traditional out board interface.
- ◆ Schedule in 30 minute increments.

- ◆ Know the schedule of up to 10 people with just a glance.
- ◆ Review & edit transactions before posting.

SPECIFICATIONS:

- ◆ Network Ready
